This page is **not** Valid XHTML 1.0 Transitional!

Below are the results of checking this document for [XML well-formedness](#) and validity.

1. Error *Line 175 column 2: document type does not allow element "p" here; missing one of "object", "applet", "map", "iframe", "button", "ins", "del" start-tag.*

`<p>`

The mentioned element is not allowed to appear in the context in which you've placed it; the other mentioned elements are the only ones that are both allowed there *and* can contain the element mentioned. This might mean that you need a containing element, or possibly that you've forgotten to close a previous element.

One possible cause for this message is that you have attempted to put a block-level element (such as "`<p>`" or "`<table>`") inside an inline element (such as "`<a>`", "``", or "``").

2. Error *Line 176 column 5: end tag for "p" omitted, but OMITTAG NO was specified.*

`</div>`

You may have neglected to close an element, or perhaps you meant to "self-close" an element, that is, ending it with "`/>`" instead of "`>`".

3. Info *Line 175 column 0: start tag was here.*

`<p>`

4. Error *Line 176 column 5: end tag for "p" omitted, but OMITTAG NO was specified.*

`</div>`

You may have neglected to close an element, or perhaps you meant to "self-close" an element, that is, ending it with "`/>`" instead of "`>`".

5. Info *Line 173 column 0: start tag was here.*

`<p class="right">`
